FABRIC SHIELD

WATER REPELLANT & UV PROTECTANT

DOUBLE PROTECTION ONE APPLICATION

FABRIC SHIELD guards outdoor marine fabrics against water leaks and color-fading caused by the elements.

Overtime, a boat's fabrics lose their water repellency and color-fastness. Eventually, the fabric begins to fade-out and leak water due to the detrimental effects of the Ultra Violet rays of the sun.

MDR's FABRIC SHIELD restores waterproofing and rebuilds UV protection in one easy spray-on application. Our state-of-the-art formula returns marine fabrics, to their original factory level of water repellency while preventing them from fading or drying out.

FABRIC SHIELD maintains the fabrics softness and breathability while adding the extra protection of stain resistance. It dries odor-free and won't leave a tacky or oily surface

FABRIC SHIELD works well on Sunbrella and other natural and synthetic outdoor fabrics. Use it on Boat Covers, Bimini Tops, Sail Covers, T-Top fabrics, Fly Bridge Enclosures, Life Jackets, and more.

Coverage: 150 Sq. Ft. per 24oz bottle. Available at better marine outlets.
